Subject: FMO / engineers practicing architecture / possibly change in Code - FYI

Paul, Lynn (aia/la) and I just met with Butch Browning about the attorney general's op which we received just before our last meeting in which he stated nothing should prohibit any engineer from practicing architecture. If you remember, this all came up because of an older agriculture engineer who wanted to know why he could not stamp plans (asked argumentatively to either Butch or Jerry at critical issues summit last year). Butch asked an assistant to have an assistant of a legislator to prepare language which would reinforce our law, working with Lynn and possibly you and me. I asked Lynn, once the legislation is drafted, to send to me and the three of us could get together to make sure language ok. Also, I asked Butch to come to our next meeting (3/16/which he agreed for 10:00) and briefly bring us up to date about the legislation and also address the code issue because we had heard he was for LA doing their own code which could be a problem with candidates taking ARE because it uses parts of present code. I also asked Lynn and any other rep of aia/la to attend, probably around 10:00.
