Discussion followed about the vegetation clean up on the levee. Lang sent representatives to tour areas of the 19th levee on Monday, 6/13/2022 with Gordon Smith at which time the representatives took notes and pictures. It was discussed as to what they can and will do and what they cannot do as to the clean up of vegetation and trees.

Susan Douglas presented 2 DOTD Pre-Flood Inspection Reports, 1 list vegetation with fences and 2 list vegetation without fences. She suggest the National Guard could proceed with clean up of vegetation with out fence issues to get started. She also stated that they needed to wait on the cost estimation from the National Guard.

Gordon states that the landowners should be responsible for the elimination of the debris on their property, said that working with the landowners as to where they would want the debris to be piled on their land would be beneficial. Bill and Gordon also stated that no debris should be pushed into the bar pits.

Gordon stated that trees in fence rows could be cut level with fences and that National Guard could do this and Susan concurred.

Susan stated that the DOTD is mainly interested in clearing vegetation and trees 15 feet from levee so that large equipment may have access of entry to levees in case of flood and to be able to identify seepage. She also said that a good grass cutting would be very penefial.

Bill Dean also gave a list of all who had access to keys for gates on the levee.
