Addendum 04:
RFQ-0000001186

Q1) I noticed on several items, ex. Item number 64, that the option for disposal is specifically incineration. This type of waste is usually far less expensive when landfilled. My questions is: Does LSU have a no landfill prerogative or is this simply the way things have always been done? If you are open to it we could provide the pricing for the disposal method that is suggested as well as a suggested price of our own in regards to disposal method.

R1) Pricing is not the only determining factor for selecting a disposal method. We must consider the exposure to environmental liability for LSU. For the bulk of the hazardous waste we generate, direct incineration is, by far, the best treatment method, as it requires our material to be in transportation for a short period of time and is then completely destroyed within hours. Direct Incineration means LSU waste is not comingled with waste from other hazardous waste generators. Fuel Blending can require that the material be transported long distances and stored for long periods of time. Landfilled items can remain in the ground for years/decades/forever. LSU has cradle to grave responsibility for these hazardous materials and environmental fines and penalties can reach into the millions of dollars. Thus, we cannot consider alternate methods than what is specified.

Q2) Does the addendum have to be submitted with our bid.

R2) The addenda should be submitted with your bid response. Addendum 02 included revised price pages that must be used for bid submittal.
