- External controller Motor Starter shall be a full-voltage reversing type with 120-volt operating coils.
- External controller overload relays shall be adjustable and sized to full load amperes (FLA) of the motor.
- External controller control Transformer shall be minimum 130 VA.
- External controller control transformer primary and secondary shall be fused for over current protection.
- External controller current transducer shall have adjustable set point from 1-135A with 200 ms or less response time.
- External controller shall stop the grinder and reverse the rotation to clear an obstruction
- External controller shall stop the grinder and reverse the rotation to clear an obstruction.
- Once an obstruction is cleared, the external controller shall return the grinder to normal operation.
- If three (3) reverses occur within a 30-second interval, the external controller shall stop the grinder motor in a jam condition and activate the grinder FAIL indicator and relay.
- If a power failure occurs while the grinder is operating, the external controller will resume operation once power is restored.
- If a power failure occurs while the grinder is in a "fail" condition, the grinder shall remain in "fail" condition once power is restored.
- Grinder reset shall only be accomplished from the controller only.

#### **SECTION 5.0 – WARRANTY:**

All submittals shall include documentation specifying standard manufactures warranty starting the date of delivery to Jefferson Parish Department of General Services at 960 1st Street, Gretna, LA 70053.
