for Solicitation # 3000020861  
VFMC Wound Vac Rental and Supplies

Line #	Item Description	Estimated Quantity	Unit of Measure	Unit Price	Extended Amount
1	<p><b>Rental</b> of a Portable Negative Pressure Wound Therapy (NPWT) device for advanced wound healing (*NOTE: This device must be compatible with all of the items being bid on lines #3-#22.) Device being bid must meet all of the following specifications:</p> <ul style="list-style-type: none"> <li>- hold a minimum three hundred (300) mL volume disposable canister (to minimize canister changes)</li> <li>- have an on-screen user guide</li> <li>- be portable, to allow for patient mobility and to include a carrying case with a pocket to store excess tubing for on-the-go therapy</li> <li>- include a battery with a minimum twelve (12)-hour life (long enough to enable patient to be mobile for a full day)</li> <li>- have an adjustable rate of dressing draw down intensity for increased patient comfort</li> <li>- have a filter system (to minimize wound odor)</li> </ul> <p>- include technology (or installed software) with capabilities to continuously monitor, measure and maintain the prescribed negative pressure at the wound site for optimal healing outcomes by adjusting pump output, compensating for wound distance, wound position, exudate characteristics, and patient movement that includes safety alarms for patient safety to alert caregivers if target pressure is not met or therapy is interrupted. This technology must be included in the tubing and pad to efficiently draw exudate away from the wound, independently monitor target pressure at the wound, and to distribute negative pressure to help reduce blockages and false alarms, and to enhance patient comfort</p> <p>Dimensions: Approx. 6.5"W X 3.125"H X 7.5"D Approx weight: 3.20 lbs.</p> <p>Therapy Adjustment Options: Negative pressure: min. 50-200 mmHG Mode of operation: Continuous or Intermittent Intensity: Variable</p> <p>Electrical: Charger/External Supply Input: 100-240 VAC, 50/60 Hz 1 Amp Charger/External Supply Output: 18 VDC, 5 Amp Patient and Enclosure Leakage Current (max.): &lt;100 microamps</p> <p>Storage Conditions: Temperature Range: -4 degrees to 140 degree</p> <p>Operating Conditions: Temperature Range: 50 degrees F to 85 degrees F</p> <p>Display Screen Features must include, but are not limited to: Power, Exit, Select, Enter and Arrow keys Therapy, Utilities and Language options Alarm silence, AC power and battery indicators LED lights</p> <p>***Must have a lock-out feature***</p> <p>Alarm Type Features must include, but not limited to: Canister full, tubing blocked, canister missing, tubing leaks, dressing leaks, therapy not activated, audible low battery, internal device, and internal memory error.</p> <p>IEC Classification: Medical Equipment Continuous Operation Type B Applied Part Class II Internally Powered Equipment IPX0</p> <p>List contact phone numbers for ordering and scheduling pick-up of devices and when calling to let vendor know when device is being put into use:</p> <p>Ordering: _____</p> <p>Scheduling Pick-up: _____</p> <p>KCI V.A.C. Freedom Therapy Unit, Item #320000.P or equal</p> <p>State canister size (mL): _____</p> <p>Specify brand (and number if applicable): _____</p>	1	Day

VFMC Wound Vac Rental and Supplies

Line #	Item Description	Estimated Quantity	Unit of Measure	Unit Price	Extended Amount
2	<p><b>Rental</b> of a Negative Pressure Wound Therapy (NPWT) device that provides three (3) therapies all by one (1) device. (*NOTE: This device must be compatible with all of the items being bid on lines # 3-20 and # 23-31)</p> <p>Device must be one unit that provides all of the following three (3) therapies:</p> <ol style="list-style-type: none"> <li>1) NPWT,</li> <li>2) Instillation Therapy (automated delivery of topical wound solutions), and</li> <li>3) Open Abdomen Negative Pressure Therapy.</li> </ol> <p>Device must hold at least two (2) different size disposable canisters: min. 500 mL and min. 1000 mL.</p> <p>Device must have an onscreen user guide/touch screen menu, simple therapeutic programming, and audible and visual alarms.</p> <p>Device must include installed technology (or software) with capabilities to continuously monitor, measure and maintain prescribed negative pressure at the wound site for optimal healing outcomes by adjusting pump output, compensating for wound distance, wound position, exudate characteristics, and patient movement that includes safety alarms to alert caregivers if target pressure is not met or therapy is interrupted. This technology must be included in the tubing and pad to efficiently draw exudate away from the wound, independently monitor target pressure at the wound, and to distribute negative pressure to help reduce blockages and false alarms, and to enhance patient comfort.</p> <p>Device must have all of the following:</p> <ul style="list-style-type: none"> <li>-technology for leak detections (to offer instant feedback to help identify leaks).</li> <li>-technology providing continuous feedback for enhanced negative pressure accuracy, monitoring pressure at the wound site, and adjusts accordingly for optimal healing outcomes.</li> <li>-features to help clinicians identify and troubleshoot negative pressure leaks, provide real-time feedback with audible and visible cues for leak location, and guide clinicians to achieve a proper seal.</li> </ul> <p>Device must be capable of containing history reports to allow clinicians to monitor alarm history, patient history, and therapy history.</p> <p>Device must have customized pressure algorithms: continuous negative pressure (from -25 to -200mmHg), technology to maintain minimum negative pressure levels (-25mmHg) between cycles, helping to prevent leaks and fluid accumulation.</p> <p>Dimensions: Approx. 8.55"W X 10.25"H X 7.5"D Approx. weight: 7.4 lbs</p> <p>Electrical: Voltage: 100-240 VAC Frequency: 50Hz-60Hz Power: 60W Battery Life: approx. 6 hours</p> <p>Environmental Conditions: Transport &amp; Storage Temperature Range: -4 degrees F to 140 degrees F Operational Temperature Range: 50 degrees F to 86 degrees F</p> <p>Device must have Touch Screen Features such as, but not limited to: Status Bar, Tabs for: Therapy, History and Utilities, Therapy Unit Configuration and Phase Status, Therapy Settings, Leak Detector, Therapy Phase, Dressing Soak, Therapy Pause/Resume and Start/Stop, Test Cycle, Help, Night Mode, Screen Guard/Settings Lock, Cancel.</p> <p>Must have Other Features such as, but not limited to: Battery charging indicating light, Speaker, SD card slot, USB port stylus. Solution container hanger arm, unit hanger arm, solution container hanger arm lock. Carry handle, Cassette tubing retention groove, Cassette pivot slot. Canister bellows (seals).</p> <p>Device must have Therapy Settings such as, but not limited to: Default settings.</p> <p>Able to set fill assist (off/on: to help user determine the correct instill volume to use during the instill phase of a therapy cycle), start phase, instill volume, soak time (minutes), therapy time, target pressure, intensity (low, medium, high).</p> <p>Low Priority/Alert Conditions: Must display on the touch screen when the therapy unit detects a condition that requires attention and are accompanied by repeating audible tones options such as, but not limited to: Audible pause, battery low, therapy blockage, solution bag/bottle empty, fill assist inactive, internal temperature.</p>	1	Day
