QUESTIONS AND ANSWERS:

Question 1. How can the existing fiberglass skylights be made watertight?

Answer 1. Surfaces can be coated with Cool-Sil Skylight Sealer (OR EQUIVALENT) must be properly prepared. The skylight surface must be clean, dry and free of loose particles. The coating can be applied by medium nap roller or brush. The recommended application rate is 32 wet mils at 1 gal/sq./coat and should be applied in multiple coats to eliminate sag or runoff. In addition to the application of Cool-Sil Skylight Sealer, the perimeter of the skylights must be sealed with Unibond tape and then topped with CPR Seam Sealer BG (OR EQUIVALENT).
