Addendum #1
Baseball Outfield Padding
50018-250010

Please note the following additions and modifications to the original scope of work for the Baseball Outfield Padding project:

ITM 1: Minor Fence Line Repairs

Perform minor repairs along the designated chain link fence line to ensure structural integrity. All materials used should match existing fence specifications for a consistent appearance and durability.

ITM 2: Outfield Doors

Repair both main outfield doors. This includes the replacement of door hardware and installation of new corrugated metal door panels to match existing color and style as needed to enhance function and security.

ITM 3: Padding Installation Requirements

The outfield padding should be installed with a 8-inch clearance from the ground to allow for maintenance access and ventilation. All padding should meet safety and durability standards as outlined in the original bid specifications.

ITM 4: Blueprint availability

No blueprint is available for this renovation.

ITM 5: Payment Terms

The payment process follows NET 30 terms and will be processed upon completion of services.
