PARISH OF EAST BATON ROUGE
DEPARTMENT OF ENVIRONMENTAL SERVICES**

March 6, 2025

ADDENDUM NO. 1

TO: ALL BIDDERS

SUBJECT: **SUPPLEMENTAL PARISHWIDE SEWER REPAIR AND REPLACEMENT
PROJECT
CITY-PARISH PROJECT NO. 25-PN-MS-0001**

BID DATE: Tuesday, March 11th, 2025 at 2:00 PM

The following revisions shall be incorporated in and take precedence over any conflicting part of the original contract document:

PART 1 – UNIFORM CONSTRUCTION BID FORMS:

1. For paper sealed bidders, with reference to page UCBF 1 of 4 of Part 1, Uniform Construction Bid Forms, the Bidder shall indicate the receipt of this addendum in the space provided. For online Central Bidding bidders, an acknowledgement of this addendum will be prompted by the electronic bidding program prior to formally submitting the bid. **Failure to indicate the receipt of this addendum shall be cause for the bid to be rejected.**
2. Replace the Unit Price Form with the attached Revised Unit Price Form (dated 03/06/25). This Revised Unit Price Form **MUST** be used by all Bidders for this project. The UCBF on the Central Bidding website has been updated to reflect the changes on the attached UCBF. **Failure to submit on the revised Unit Price Form shall be cause for the bid to be rejected.**

PART 2 – SPECIAL PROVISIONS AND CONTRACT DOCUMENTS:

1. For paper sealed bidders, with reference to page UCBF 1 of 4 of Part 1, Uniform Construction Bid Forms, the Bidder shall indicate the receipt of this addendum in the space provided. For online Central Bidding bidders, an acknowledgement of this addendum will be prompted by the electronic bidding program prior to formally submitting the bid. **Failure to indicate the receipt of this addendum shall be cause for the bid to be rejected.**
2. Replace the Unit Price Form with the attached Revised Unit Price Form (dated 03/06/25). This Revised Unit Price Form **MUST** be used by all Bidders for this project. The UCBF on the Central Bidding website has been updated to reflect the changes on the attached UCBF. **Failure to submit on the revised Unit Price Form shall be cause for the bid to be rejected.**

SPECIAL PROVISIONS

1. Replace paragraph two in Section 2-2 Preparation of Proposal Form with the below:

Currently the electronic bidding software utilized by the City-Parish, Central Bidding, does not allow fixed amounts to be pre-inserted in the unit price form. The fixed amount is listed in the description of the Traffic Control Allowance (by Subcontractor), Aerial Crossing Allowance and Utility Relocation Allocation bid items. If the bidder chooses to submit a bid electronically, then the bidder MUST insert the exact fixed amount listed in the description in the unit price form. Failure to do so will deem the bidder non-responsive.

2. Remove existing Section 8 Utilities and replace with the revised copy attached to this Addendum.
3. Add the following to Section 903 Erosion Control:

903-4 Measurement: Add the following to the end of this section:

f. Hydroseeding: This item shall be measure per square yard of hydroseeding slurry installed within the pay limits and as approved by the Engineer. The pay limits shall be in accordance with the standard trench details and as shown on the drawings or as directed by the Engineer. When the Work falls within a right-of-way or servitude wider than 25 feet, the pay limit shall be limited up to a maximum of 12.5 feet measured from centerline of existing or proposed pipe on both sides (up to right-of-way or servitude limit) for a maximum of 25 feet total. In the case of parallel pipes, overlapping areas will not be double paid. Payment shall not be for hydroseed slurry placed outside of the pay limits in areas damaged by the Contractor.

903-5 Payment: Add the following after the third paragraph in this section:

Payment for hydroseeding will be full compensation for all labor, equipment, seed, fertilizer, tackifier, water, and other materials or incidentals required for the placement of hydroseeding slurry.

903-6: Pay Items: Add the following at the end of this section:

9031700	Hydroseeding	Square Yard
---------	--------------	-------------

4. Remove existing Section 9999992 Truncated Dome.

QUESTIONS

1. Can you provide the bid tab for the previous time this project bid?

A copy of the bid tabs from 23-PN-MS-0011 and 24-PN-MS-0031 have been attached to this addendum.

2. What is the estimated cost or the upcoming Baton Rouge Sewer Repair project that bid on March 11th?

The Engineer's Estimated cost cannot be provided at this time.

SECTION 8 UTILITIES

8-4.3 Utilities To Be Adjusted: This subsection is deleted and replaced by the following:

The Contractor shall coordinate with each utility owner to have utilities that are in conflict with the Work relocated. Coordination activities shall include as a minimum communication (verbal and written) with all utilities with facilities potentially in conflict with the Work, meeting with the utility owners on site of conflicts, and working cooperatively with those utilities to schedule any required relocation work by the utilities or their contractors. The Contractor shall provide schedule updates of any change to the schedule of Work to all utilities affected every two weeks. Copies of all communications between the Contractor or subcontractors and the utilities shall be provided to the Engineer is requested.

Owners of utility facilities which require relocation, removal or adjustment shall, if possible, perform this work prior to commencement of the Contractor's work. Where utility work must be done in conjunction with the contractor's work or the work of other utilities (such as sewer rehabilitation work), arrangements for when, how and where the operation is to proceed shall be worked out among the parties concerned.

In this case, the Contractor shall notify public utility companies in writing at least 48 hours (excluding Saturdays, Sundays, and legal holidays) before excavating near their utilities. If a utility that is located outside of a public right-of-way must be relocated in order to perform the work the Contractor shall coordinate with the utility and pay the utility to perform the relocation work. Utility invoice shall be reviewed and approved prior to authorization by the Owner to proceed with the Work. The Contractor will be reimbursed for the actual cost of this relocation plus ten percent (10%) markup. Utility invoice paid receipt or canceled check will be required from Contractor for reimbursement.

In the case of traffic signal utilities, the Contractor shall notify the DPW Traffic Engineer at 389-3246 when traffic signal utilities are encountered. Removal and replacement or relocation of such utilities shall be according to their applicable specifications and direction. Contractor will be reimbursed for the actual cost of replacing or relocating traffic signal utilities such as traffic counting loops, conduit, or fiber optic lines under the utility relocation allocation. Contractor will be required to provide detailed documentation for all costs associated with this Work, which shall be reviewed and approved prior to authorization by the Owner to proceed with the Work. Payment of the allocation for this item will be on the basis of documented and approved expenses plus ten percent (10%).

Total relocation cost may not exceed available contract allocation without prior City/Parish approval.

Add the following after subsection 8-4.5:

8-4.6 Utility Conflicts on Sewer Rehabilitation Projects: All sewer rehabilitation projects are inherently complicated with existing utilities. A majority of the existing sanitary sewers to be rehabilitated are located in existing residential subdivisions and situated within public utility servitudes which are shared by all other types of service utilities (electrical, gas, telephone, cable, etc.). It is anticipated that the progress of this work will require special care and attention to the utilities that exist within the rights-of-way and servitudes, and intense coordination with various utility owners.

Contractor shall plan excavation to avoid damage to or minimize interference with underground utilities and facilities in and near the repair area. If necessary or as directed by the Engineer the Contractor shall "pothole" or dig test pits to expose and determine the actual location of utilities and verify if a conflict exists. Potholing may require hand excavation by the Contractor as to avoid damaging utilities. Contractor shall coordinate with utility owners to have utility representative on site if necessary during potholing activities. **It should be noted by the bidder that it may be**

necessary to modify the limits or type of repair shown on the plans or add additional repairs to this contract in order to minimize or avoid conflicts.
