In the event that a lane of traffic will need to be closed, the Contractor shall provide sufficient notification to the Jefferson Parish Traffic Engineer of necessity to close any portion of the roadway carrying vehicles or pedestrians. The Contractor will request final approval of such closings from the Department of Public Works, Traffic Engineering Division, at least ten (10) working days in advance.

The Contractor shall be responsible for providing safe and expedient movement of traffic through the work Sites. The Contractor must have in place prior to work, a method of recording, responding and repairing legitimately damaged property experienced due to the work being performed.

The Louisiana State Manual for Uniform Traffic Control shall be strictly enforced.

#### **GENERAL SPECIFICATIONS:**

The contractor shall submit unit prices for typical irrigation components to be repaired and/or for installation. All bid items shall have a turnkey price that includes material, labor, tools and incidentals.

This is an as-needed contract and there is no minimum or maximum quantity of guaranteed work associated with the contract.

Contractor agrees to be bound to all applicable provisions of State and Parish laws concerning irrigation work, as well as policy decisions of the Parkways Department.

Irrigation repair and maintenance work shall occur on an as-needed basis on various automated irrigation systems located throughout Jefferson Parish. The majority of these systems are located within the public right-of-way. The Contractor is encouraged to become familiar with the locations of these systems and assess his approach for site access, traffic control, worker safety and anticipated common repair issues. A list of probable locations is included with these specifications.

Unless permission is granted from the Director of Parkways, and with the proper documentation, the Contractor shall not access private property for any irrigation work.

All traffic control, signs, barricades and signals are the responsibility of the Contractor. Unless prior approval is given from the Parkways Department, the Contractor shall not block more than one lane of traffic when performing his work. The Contractor must provide a minimum of 72 hours' notice to the Parkways Department prior to blocking any lanes and/or sidewalks along commercial corridors.

Any trash or debris generated by irrigation work shall be removed from the site by the Contractor the same day that it was generated. There shall be no trash or debris left at a site unless the Contractor is present and working.

The Contractor shall not leave a site with any open holes or trenches. When working, the site must be secure before the Contractor can leave.

Whenever possible, the Contractor shall make repairs utilizing the same equipment already associated with each system. This shall include, but not be limited to, valves, controllers, backflow preventers and irrigation heads and nozzles. In the event that a product is no longer available, the Parkways Department shall approve any as-equal replacement parts prior to installation.

#### **INSPECTIONS AND REPAIR:**

Deficiencies in the irrigation system(s) shall be detected by the Parkways Department. When a system(s) is not operational, a representative from the Parkways Department will notify the Contractor of the anticipated issue and the location of the problem. It is likely that the description of the deficiency will not be fully investigated by the Parkways Department. An explanation of the problem from the Parkways Department may be described as 'a leak has been detected', 'the system is not coming on', 'a valve is stuck', 'a head appears to be broken', or similar. In the event of a leak, it is likely that a Parkways Department representative will turn off the irrigation system at the backflow preventer(s) and the controller. It will then be the responsibility of the Contractor to investigate the location and provide the Parkways Department with a written proposal for the work required to make the repair.

While investigating the site(s), the Contractor will have the ability to make minor repairs to save time and limit the number of site visits to correct the problem. Minor repairs shall include, but not be limited to, head replacement, main or lateral line leak repairs or nozzle adjustment. In order to receive on-site approval to make minor repairs, the Contractor shall call the Parkways Department representative to explain the issue(s) and provide a solution for repair based on the incidental bid item pricing sheet. If the representative from the Parkways Department agrees with the Contractor's proposal, he shall verbally approve the work and send the Contractor an e-mail approving the work. In the event that the repair cannot be made at the time of the site inspection, or if the proposal is not agreeable with the Parkways Department representative, then the Contractor must provide a written proposal for approval and perform the work at a later date.

When making any irrigation repair, the Contractor shall be required to test the each repaired irrigation zone to ensure no additional issues are present. If any other problems such as leaks or malfunctioning equipment, they should be brought to the attention of the Parkways Department representative.

All repairs shall be made in a timely fashion. The Contractor shall propose a work schedule for each repair. Once the schedule is agreed upon by the Contractor and the Parkways Department, that schedule shall be adhered to (weather permitting). Failure to complete work in accordance with the approved schedule may result in liquidated damages (see LIQUIDATED DAMAGES).

#### **INCIDENTAL BID ITEMS:**

This contract contains a list of common incidental repair items that could be used during this contract. The Contractor shall provide a unit price for turnkey installation of each bid item. There is no guaranteed minimum or maximum quantity of any bid item to be used on this contract. When available, replacement parts shall match the existing component by manufacturer and/or product number. In the event that an 'as-equal' component is needed, the Contractor shall receive written approval from the Parkways Department prior to installation.

Line items for incidental complete irrigation system inspections are included with this contract. Incidental complete irrigation system inspections shall be as-needed inspections as directed by the Parkways Department. The Contractor shall include a report with each inspection that documents the current state of the system and lists any needed repairs. A complete irrigation system inspection shall include, but not be limited to, inspection of the meter, backflow preventer and controller. The inspection shall also consist of running each zone and monitoring the output of each irrigation head. The inspection shall include minor adjustment of nozzle aiming to ensure spray patterns are providing complete coverage and are not spraying onto the roadway, sidewalk or other areas not intended to receive irrigation. The inspection shall include an inventory of all valve boxes and lids. Pricing for each inspection shall relate to the number of valves of the system at a particular site location (see LOCATIONS).

- Complete irrigation system location inspection up to five (5) valves
- Complete irrigation system location inspection up to ten (10) valves
- Complete irrigation system location inspection up to twenty (20) valves
- Complete irrigation system location inspection over twenty (20) valves

Note: Valve counts shall include master valves, where applicable.

Line items for incidental adjustments (controller, backflow preventer and/or water meter) are included with this contract. Incidental adjustments shall be as-needed system adjustments as directed by the Parkways Department. Adjustments may include controller time(s) programming, turning on/off the backflow preventer and/or turning on/off the water meter. Pricing for each adjustment shall include a site visit to each specified location and performing any (or all) of the previously mentioned tasks. Pricing shall be provided based on site locations (see LOCATIONS).

- Incidental adjustment location with one (1) controller, backflow preventer and/or meter.
- Incidental adjustment location with up to five (5) controllers, backflow preventers and/or meters.
- Incidental adjustment location with over five (5) controllers, backflow preventers and/or meters.

#### **MAINTENANCE REPORTS:**

Any time a repair is made, the Contractor shall be required to submit a maintenance report outlining the repairs. The report shall include the following minimum information: date, site location, technician(s), description of the repair and any parts that are replaced. When listing any replacement parts, a manufacturer and model number shall be included. A completed maintenance report shall be included with the invoice for the work. Failure to provide a maintenance report will delay payment of the invoice.

#### **WARRANTIES:**

It is possible that some existing irrigation components associated with this contract are still covered under the original manufacturer's warranty. In the event of any required warranty work for existing irrigation components, it will be the Contractor's responsibility to acquire the warranted replacement part(s), but all associated labor and installation costs will be paid by the Parkways Department. The Contractor shall provide a proposal for his labor and installation costs for approval by the Parkways Department when warranty work is required.

All replacement parts shall carry a manufacturer's warranty. If any replacement part installed by the Contractor malfunctions under the stipulations of the manufacturer's warranty, it shall be the responsibility of the Contractor to cover all associated cost with repair and or replacement.

While manufacturer's warranties will vary, the Contractor's associated labor for any installed irrigation part shall be warranted for a minimum of six (6) months from the installation date, or until the end of the contract. The Contractor shall not be held responsible for any damage outside of his control.
