This is a “Concrete (Street) Maintenance Contract”. It is intended to supplement work performed by regular maintenance forces of the Department of Public Works – Streets. Types of work under this contract include, but are not limited to concrete maintenance projects such as: concrete slab removal and replacement, concrete curb repairs, roadway revisions such as the addition of concrete turning lanes and median crossings, sidewalk/handicap ramp and drive apron replacement and new installations (typically when in conjunction with a work order that includes panel replacement, but may be without panel replacement), additions or revisions to subsurface drainage systems and structures.

The contract will be for a period of two (2) years. Contract prices are firm during the entire two (2) year contract period.

The quantities in the proposal form are approximate for the comparison of bids only. The parish reserves the right to purchase only such items and in such quantities as needed for the duration of this contract after acceptance of the lowest responsible bid by the parish governing authority.

The definition of “JOB” shall be the work described on any one issued work order. Each “JOB” shall be estimated as to time required to complete the amount of work proposed. Many “JOB” sizes will be relatively small: that is, the paving of several street panels having a normal width of 13 feet and each being from 15 to 20 feet in length. However, some “JOBS” may require the paving of several adjoining panels resulting in hundreds of square yards of paving. Most of the work areas are residential streets. Occasionally contracts may involve replacing slabs on major streets (minimum thicknesses of 9”/10” for slabs are required on these streets). Contractor may also be required to replace slabs as soon as possible in the event of blowouts.

Contractor shall supply a minimum of (2) complete crews for the duration of this contract. A complete crew shall be comprised of all qualified persons and equipment required to remove / dispose of existing concrete, form-up, and pour / finish new concrete pavement (i.e. 1 complete crew = breakout crew + form-up crew + pour / finishing crew). Having one breakout crew that proceeds from one work order location to the next work order location in advance of the subsequent form-up crews will not be allowed.

Each work order will be issued in writing with appropriate drawings if required, or other attachments and will designate a job number (WO#XX-XXX). All correspondence, billing, etc., pertaining to the work should reference the job number. Payment will be made upon receipt of detailed and itemized invoices and verification by parish inspectors regarding quantity and quality of work performed. Partial payment will be made only when completion is unduly delayed through no fault of the contractor in which case requests for partial payment may be submitted monthly.

All of the work within the limits of each job shall be shown to the contractor by a representative of the Department of Public Works prior to commencing work. If required, appropriate sketches and/or drawings may be furnished to the contractor with each work order. Work sites may be scattered for an individual work order; however, every effort will be made to consolidate the work to minimize scattered work sites. The contractor shall begin the work within 10 calendar days

BID # 50-00147302 - SPECIFICATIONS

after issuance date of a work order. All street layouts/surveying for each work order shall be incidental to the bid items with no additional payment.

Each work order must be completed in a timely manner based on the area of concrete panels being replaced. If the work order is not completed in the specified time from the first day on site, then liquidated damages will be assessed. See the table below for time allowed:

Job Size (s.y. of PCCP)	Allotted Construction Time (calendar days)*
100 or less	21
101-300	50
Greater than 300	100

* Only the Director (of Streets Dept.) can approve the work to go beyond the days stipulated in the table above depending on the size / scope of the project.

If any work order does not begin in the allotted commencement time period (10 calendar days from issuance) or work remains incomplete past the allotted construction time (based on the table above), then the contractor will be assessed a liquidated damage cost of **\$250 per day** past the required start date and/or required completion date. The liquidated damage cost will be deducted from the final individual work order invoice.

Time extension will be granted for excusable days that are not the contractor's fault (like water or sewer leaks) and for inclement weather days. Excusable days must be documented in writing (email) by the contractor and are subject to approval by the Director (of Streets Dept.). Inclement weather days shall be defined as any day on which construction operations were unable to proceed for at least five (5) continuous hours of the day or 65% of the regular working hours, whichever is greater. Should the contractor prepare to begin work on any given day in which inclement weather or the site conditions resulting from previous inclement weather prevent work from starting at the usual time (and the crew is dismissed as a result thereof), then the day will be declared an inclement weather day, regardless if conditions improve, resulting in the rest of the day becoming suitable for work. Inclement weather days must be documented by the contractor and are subject to the approval by the Director (of Streets).

If contractor leaves the job incomplete for over a 30 day period, the parish has the right to use other Parish contracts as a means to complete outstanding work and the ability to bill the current contractor with those charges incurred. However, if the contractor has a valid reason to hold off on a job, he has to obtain written permission from the Director of Streets for the stipulated delay.

Also, the owner has the right to put a hold on a job at the beginning or when job is in progress without designating a reason. If the job is discontinued, the contractor will be compensated only for the items of work actually done and not for any down time.

Contractor shall not work during the holidays observed by Jefferson Parish unless otherwise authorized in writing by the director.

Contractor shall not schedule any contract work on major roads and thoroughfares between Thanksgiving and New Year holidays, or during Mardi Gras season.

If any sworn statements of claims are filed during the term of this contract, the parish shall withhold the next accruing payment and shall have the authority to satisfy the claim and deduct the amount from payments due.

BID # 50-00147302 - SPECIFICATIONS

If any liens arising out of this contract should be discovered to exist after all payments are made, the contractor shall refund the parish all monies that the latter may be compelled to pay in discharging such liens, including litigation costs and attorney's fees.

Adequate safety precautions will be taken for all work performed under this contract. Necessary barricades, signs, lights and warning devices including arrowboard if required will be installed and maintained by the contractor in accordance with Parish Traffic Engineering and Safety Standards.

All traffic control devices shall be defined as all signs, signals, markings and other devices used to regulate, warn, or guide traffic, placed on, over, or adjacent to a street, highway, pedestrian facility, or bikeway under the jurisdiction of Jefferson Parish.

All traffic control devices utilized under the terms of this contract shall be in accordance with the "Manual of Uniform Traffic Control Devices" (Latest Edition) as published by the American Traffic Safety Services Association (ATSSA).

The contractor shall be responsible for, at their own expense, providing safe and expeditious movement of traffic through construction zones, i.e., the immediate area of actual construction and all abutting areas used by the contractor and which interferes with the driving or walking public. Contractor responsibility includes, but is not limited to such items as proper construction warning signs, signals, lighting devices, (including electrical/electronic flashing arrow board), markings, barricades, channelization, hand signaling devices, (flagging operations), construction warning signs, detour routing, and any/all additional signage required for proper traffic control shall be provided by the contractor at no additional expense to Jefferson Parish. The Principal and Prescribed Standards are set forth in Part VI of the Manual on Uniform Traffic Devices, Latest Edition. Part VI shall be strictly followed.

All of the signing and traffic control devices shall be approved by the Office of Traffic Engineering, Jefferson Parish Department of Public Works prior to starting the job. All expenses incurred by the contractor to maintain traffic flow is incidental to the job, there shall be no added or additional payment.

Contractor shall inspect all overhead, surface and sub-surface utility lines prior to start of the project. During the performance of all work outlined in these specifications, the contractor will exercise due caution regarding underground utilities and will cooperate with representatives of the utility companies and/or parish departments to avoid damage to their installations. However, contractor is ultimately responsible for all damages by his actions.

Contractor must locate, protect, support and maintain all subsurface, surface and aerial utilities. In the event of any damage to existing utilities, contractor shall restore service, as soon as possible at contractor's expense. Contractor shall have the sole responsibility of resolving any lawsuit and liabilities arising from defective workmanship, improper maintenance of utilities and/or work site.

If there are any conflicting utilities that need relocation or adjustments, the contractor will allow reasonable time to accomplish this task. There is no added compensation for delays and cost caused by the conflict.

BID # 50-00147302 - SPECIFICATIONS

Contractor should consult with the Department of Public Works Traffic Engineering Division immediately upon any vehicular or pedestrian safety or efficiency problem incurred as a result of construction of a project.

BID # 50-00147302 - SPECIFICATIONS

- The total cement content shall be a minimum of 630 lbs. /CY.
- Fly Ash shall not exceed 20% and Slag shall not exceed a 50% maximum.
- The maximum water-cement ratio for shall be 0.35.

The bulk volume of aggregate per cubic yard shall be equal to 27 cubic feet when calculated from dry rodded density (unit weight) determined in accordance with ASTM C29. Fine aggregate, if used, should not exceed three (3) cubic feet and shall be included in the total aggregate volume.

Admixtures shall be used in accordance with manufacturer's recommendations.

The quantity of water used in the previous concrete mixture shall facilitate placing, compaction, and finishing to the desired surface characteristics. The appropriate water content will give the mix a wet metallic sheen without causing the cement to flow from the aggregate and be sufficient for adequate hydration. If the water content is too low, the mix may be inconsistent and produce poor bond strength. A high water content may cause the cement to migrate toward the bottom and fill the voids as well as create a poor surface bond.

Testing shall be in accordance with ACI 522.1-13 Section 1.5.

THE BELOW SPECIFICATIONS APPLY TO ITEMS 0280 THRU 0300:

4000 PSI high early strength (24 or 72 hours), (No. 4 deformed reinforcing bars are to be included in price of this item. Excavation will be paid by cubic yard truck measure loaded at the job sites or by computing theoretical volume at the approval of the parish representative. Fill materials will be paid by cubic yard truck measure delivered to the work site. Bid prices shall include costs for compaction and grading of materials when used for base construction. Should the parish desire, the contractor will dump excavated materials at a disposal site designated by the parish at no added cost, provided that the disposal (dumping) site is within a 21-mile radius of the work site and may involve crossing the Mississippi River. Additionally, should the parish desire, the contractor will load excavated material onto parish trucks at the work site at no added cost provided that the parish trucks are present at the work site at the time of excavation and do not unduly delay the contractor's work. However, ultimate responsibility for disposal of all the excavated material rests with the contractor. Haul and/or loading tickets will be issued for each truck load of material delivered and placed on the job and/or truck load of excavated material haul from the job site.

All the original haul tickets must be furnished by the contractor for payment.

The contractor will exercise due caution regarding underground utilities during excavation operations and will notify and coordinate with representatives of utility companies and parish departments to avoid damage to their installations. There will be no additional compensation for the time delay caused by the conflicts.

No trucks with greater load capacity than 18 cubic yards shall be allowed on residential streets for excavation, concrete/asphalt removal or fill material delivery without authorization from the engineer. Should the contractor fail to meet this condition, all damage resulting will be repaired at the contractor's expense.

D. TIMELINES

1. Prior to the closing time for receipt of scheduled bids

A bid may be withdrawn at any time prior to the scheduled closing time for receipt of bids, provided a request in writing, executed by the bidder or his duly authorized representative, is filed with the Parish prior to that time. When such a request is received, the bid will be returned to the bidder unopened. However, no bid can be modified, corrected or withdrawn after the time set for closing such bid, except as provided by LSA-R.S. 38:2214(C) & (D).

The Parish, its engineers, architects or anyone distributing plans and specifications for Parish public work projects, equal to or over the contract limit as defined in LA-R.S. 38:2212, shall furnish all prime bidders who request bid documents and who are properly licensed by the Louisiana State Licensing Board for Contractors with at least one set of complete bid documents. A deposit or fee may be charged on the documents as authorized by LA-R.S. 38:2212.

Addenda may be issued, as authorized by LA-R.S. 38:2212 (O). All formal Addenda require written acknowledgment on the bid form by the bidder. Failure to acknowledge an Addendum on the bid form shall cause the bid to be rejected. Jefferson Parish reserves the right to award the bid to the next lowest responsive and responsible bidder in this event.

Prior to submitting a bid each bidder shall visit the site of the proposed work and fully acquaint himself with all surface and subsurface conditions as they may exist so that he may fully understand the facilities, difficulties, and restrictions attending the execution of the work under this Contract. Bidders shall also thoroughly examine and be familiar with Drawings, Specifications, and Contract Documents. The failure or omission of any bidder to receive or examine any form, instrument, drawing, or document or to visit the site and acquaint himself with conditions there existing, shall in no way relieve any bidder from any obligation with respect to

his bid and the responsibility in the premises rests with him. Submission of a bid shall be considered prima facie evidence that the bidder has made such examination and is satisfied as to the conditions to be encountered in performing the work and as to requirements of the plans, project specifications, Resolution No. 141125, as amended, and contract forms.

Any pre-bid test and boring data in connection with subsurface conditions which have been completed by the Parish or its engineers and furnished to the bidder shall not be considered as fully representative of subsurface conditions existing throughout the area tested nor shall they in any way be binding upon the Parish, it being understood that said data is furnished the bidder for his convenience only and the bidder shall be solely responsible for conducting his own boring explorations he deems necessary in preparing his bid. Any prospective bidder wishing to conduct boring explorations on Parish property must obtain written permission from Jefferson Parish prior to such explorations.

No claims shall be made against the Parish for additional compensation due to unforeseen subsurface conditions arising during progress of the work and which might be in variance with the Parish's pre-bid boring data.

2. Post-closing time for receipt of scheduled bids

Except as where provided by law, bidder agrees that this bid shall be legally binding and may not be withdrawn for a period of forty-five (45) calendar days after the scheduled closing time for receiving bids. In the event the Parish issues the Letter of Award (copy of adopted resolution awarding bid by Jefferson Parish Council) during this period, the bid accepted shall continue to remain binding pending execution of the Contract.

Bidder agrees to execute the ensuing Contract and will deliver applicable Bonds to secure the faithful performance thereof.

The Parish of Jefferson reserves the right to cancel this contract for convenience by issuing a thirty (30) day written notice to contractor.
