**Bid Date: Thursday, May 1<sup>st</sup>, 2025 @ 2:00PM**

The following Addendum change is being made to the Invitation to Bid and shall take precedence over any conflicting part of the original contract documents:

**QUESTIONS & CLARIFICATIONS:**

1. How is concrete patching on Hollywood St expected to be performed with regards to temporary traffic control?

Please be advised that concrete patching along Hollywood Street will be performed using various methods, depending on the location of the work. *Local access will always be maintained.* The following outlines the approach for different segments and conditions specifically related to Concrete Patching Items on Hollywood St:

**Hollywood Street (Scenic Hwy to I-110)**

Due to low Average Daily Traffic (ADT), **overnight lane closures** in the immediate vicinity of the patching will be sufficient for this segment.

**Hollywood Street (I-110 to Plank Rd)**

Concrete patching lane closures will be limited to **Monday–Friday, 7:00 AM to 7:00 PM** only. **Weekend work** and the use of **high-early-strength concrete** are expected to minimize traffic impact.

**Hollywood Street (Plank Rd to Airline Hwy)**

The contractor may implement **detours, local-traffic-only road closures, or one-way directional closures** as needed to perform the patching work efficiently.

**Major Intersections (within 500 ft of Plank Rd, Foster Dr, McClelland Dr, and Airline Hwy)**

Lane closures for concrete patching in these areas will also be restricted to **Monday–Friday, 7:00 AM to 7:00 PM** only. **Weekend work** and **high-early concrete** usage should also be anticipated.

This addendum is hereby made an official part of the referenced Invitation to Bid.
