Addendum 01

Supplier Inquiry and Response

Q1. The specifications for the Holiday Lawn – Dangling Lights, the wire/cable color is specified as black, but would a green cable/wire be acceptable?

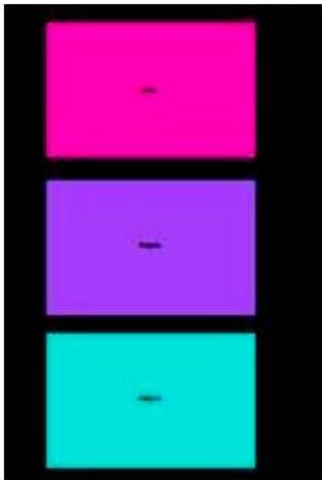

A1. Black cables are the only acceptable option.

Q2. In the Scintillating Stream section, the specs call for 75% of the lights to be Dark Blue, steady on, and 25% of the lights to be Light Blue, hard on/off twinkle (not slow fade), however the Master plan specifies S-4 Supernova Glacier Mix, which is a mix of blue/white/aquamarine bulbs on each strand. The three colors can not have different effects but separate strands can. Would the Glacier mix be acceptable?

A2. The Master Plan is included only to help demonstrate the entire show setup with all activations installed. **The Scintillating Stream and all other activations must meet the specifications in this bid.** They must work with the current lights we already have.

Q3. For the "Dangling Lights" in the Holiday Lawn and Lakeside Stroll locations, would strand with C7 or C9 bulbs be acceptable?

A3. All string lights must fall in the 5 to 7 mm twinkle light range. The old C7 and C9 are too large. See photos below for example.

Q4. In the "Pole Trees" section of Lakeside Stroll, it is indicated that the custom cables will be provided by LSU. Is this also true for the custom cables for the "Dangling Lights" in the Holiday Lawn and Lakeside Stroll?

A4. The cables that LSU provides are "braided cables" for stability and anchoring poles to the ground. This braided cable provided by LSU is only for pole trees, no other activation. All other custom cables listed in specifications must be provided by supplier. See photo below for example of custom cable.

Q5. Timelines are very tight. Would a delivery date in Oct be acceptable?

A5. Supplies must be delivered no later than October 1st, 2025.
