RADIO STATION ENGINEERING SERVICES FOR KNSU-FM
PAGE 1 OF 3**

SCOPE: Nicholls State University seeks the services of a qualified firm to provide an engineer as required by the Nicholls State University Radios Station, KNSU-FM, to assist in maintaining the electronic systems of the station.

TERM: This contract shall begin on July 01, 2025 and end on June 30, 2026. At the option of the University and the acceptance of the contractor, this contract may be renewed for two (2) additional twelve (12) month periods at the same rates terms and conditions.

REQUIRED SERVICES OF THE ENGINEER: The requirements of service to be provided under this contract shall include:

A. Studio Maintenance: The maintenance responsibilities required for the studio can be classified into two areas, preventative and corrective. A facility maintenance program shall be utilized for the purpose of observation and correction of technical problems as recorded by the staff and operators.

The establishment of a technical reporting system shall be implemented, This shall consist of a pre-printed form that shall describe and identify technical problems as they occur. This shall allow for written documentation of problems, records of corrective action, and status tracking of equipment. Copies of the problem reports shall be faxed to the Engineer for service preparation. A monthly report of problems and corrective actions shall be submitted for maintenance records.

The Department of Mass Communications shall provide the availability of an appointed on-staff liaison that would be available for maintenance coordination and light maintenance responsibilities and for daily identification of maintenance problems in the studio. This individual shall work closely with contract engineer as a source of communication regarding technical and operational problems.

Additionally, the contract engineer will be on-call for emergency problems and shall provide a 24-hour answering service and paging numbers for emergency technical problems and assistance.

The engineer shall be required to make a mandatory visit to KNSU once a month. Failure to visit the station monthly may result in the forfeiture of the monthly fee paid to the firm by the University.

In the event a problem arises and the University contacts the engineer, the engineer shall respond via e-mail or telephone within two business days.

If a visit is required to address the problem, the engineer shall make a service call within seven business days, unless it is an emergency.

B. Transmitter Maintenance: The responsibilities for the transmitter site fall into four categories; preventive maintenance, corrective maintenance, operations supervision, and transmitter site equipment (i.e. tower, transmission line and antenna equipment). These four areas shall be addressed on a bi-monthly, quarterly, and annual basis as specified by the equipment manufacturers. Additionally system performance test for frequency response, noise, and product quality shall be checked on an as-needed basis to be determined by the appropriate University personnel.

The routine and preventive maintenance of transmitters shall be carried out on a weekly basis, including inspection and correction of any problems. Transmitter performance and early problem diagnosis may be done weekly since the operator on duty records all transmitter readings.

Corrective maintenance shall be required at times of equipment failure or when monitoring conditions show that a potential problem is surfacing. When a total failure of the main on-line system occurs, a backup system should be able to be brought on-line. This shall allow minimal loss of service between change over of the on-line system to the off-line backup system equipment when need

B. Transmitter Maintenance Continued

If backup systems are not available, repair of the main system will be scheduled at the earliest available time with respect to the programming schedule, parts availability, and the availability of a technician. It should be made clear that the availability of service personnel, parts, test equipment and backup systems is the only way to facilitate continuous programming when a failure occurs. Otherwise, delays in resuming operation are not the responsibility of Engineer.

The operations personnel shall be instructed by their appropriate supervisor regarding the operation, problem reporting, logs, and alarm indications of the facilities' systems. The staff shall be required to learn how to follow the procedures provided of what to do when a problem or alarm occurs, and recording of data for FCC files. Notification of a problem or symptom to the appointed staff assistant shall be the first priority of all staff members when something abnormal occurs. The on-staff appointed assistant shall be the liaison for problem reporting.

Should the assigned contract engineer be knowingly indisposed for a period of time (i.e., vacation, another station called first, illness, etc.), a substitute engineer shall be assigned to be available on a standby basis. The maintenance of transmission equipment, such as towers, feed lines, tower lighting, electrical service, HVAC, generators, and antenna equipment, is not the responsibility of the contract engineer. These

responsibilities require specialized skills and equipment. All tower work or transmission equipment work shall be coordinated and supervised by the contract engineer and the General Manager of the Station with regards to independent contractors, factory representatives, factory service and independent companies.

Maintenance records regarding work done will be maintained for duty verification and maintenance tracking. A monthly service report shall be provided to the Station documenting system actions taken by the contract engineer.

C. FCC Compliance: Supervision of FCC logging requirements of staff operators shall be the function of the University. This includes proper procedure, EBS records and modulation levels and maintaining technical specifications. It is the sole responsibility of the University, not the contract engineer, to notify the General Manager and advise him of any problem that would put the Station in violation of FCC regulations. Additionally, the contract engineering service cannot be held responsible for compliance due to the participation of other staff members in the day-to-day operations of the facility, but the Engineer shall make every effort to point out areas of non-compliance when encountered.

D. Installation of Equipment: The services provided in this specification are for the existing equipment and facilities of the Station. Routine replacement or equipment additions shall not be part of the contract maintenance engineer's responsibilities. The firm is not authorized to purchase equipment on behalf of the University. They may assist the University by providing recommendations on the equipment that is needed, but shall not automatically assume that they can place a piece of equipment whenever needed. The University must follow all procurement codes regarding purchases of equipment. Major construction additions or remodeling, is not in the scope of maintenance engineering responsibilities.

E. Studio Construction or Major Installations: Expansion, major construction, studio remodeling, or facility upgrades fall outside of the scope of this maintenance contract. Services of the above type will be available on a bid or hourly basis. In all cases, actions of this nature will be pre-arranged and done at the General Manager's approval.

Expenses incurred such as drafting supplies, phone, travel expenses, etc., outside of the allowances within this agreement will be submitted by invoice for payment. These type of expenses cannot be incurred without the University being informed of the cost.

G. Exclusions of Maintenance Program: It is not the responsibility of the contract engineer to provide for parts, specialized test equipment, materials and expenses associated with maintenance duties. The contract engineer shall provide the station manager with the required information so that the University may have a purchase order issued to secure the necessary parts required. At no time shall the contract engineer have the authority to purchase miscellaneous items and parts for usage by the Station.

Although most equipment may be repaired by local personnel, some equipment repairs require specialized test jigs, training, parts, outside consultants and test equipment. It shall be up to the discretion of the University, upon the recommendation of the contract engineer, to make the determination if a piece of equipment shall be returned to the factory for repair. Equipment expenses and charges associated with factory return for repair or maintenance will be the responsibility of the University. Tower maintenance is not within the scope of this service agreement. TSG will refer and utilize independent and insured tower contractors at stations expense should these services be required.

Expenses outside of the prescribed routine maintenance requirements will be submitted for reimbursement to the Station. This includes freight, rental of specialized test equipment, etc.

The contract engineer shall not be responsible for lost revenue due to down time of equipment or transmission systems.

Catastrophic failures due to acts of god or weather are not considered maintenance type failures. The contract engineer shall invoice for time and materials in accordance to the compensation rates outlined within this agreement.

The contract engineer shall continually attempt to stay up to date with the latest technology and engineering practices. This shall be done through product research, equipment evaluation, trade journals, trade organizations, and association with peers. EXHIBIT D

INSURANCE REQUIREMENTS
FOR NEW CONSTRUCTION, ADDITIONS AND LARGE RENOVATIONS

The Contractor shall purchase and maintain without interruption for the duration of the contract insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the work hereunder by the Contractor, its agents, representatives, employees or subcontractors, or anyone employed directly or indirectly by any of them. The duration of the contract shall be from the inception of the contract until the date of final payment.

A. MINIMUM SCOPE AND LIMITS OF INSURANCE

1. Workers Compensation

Workers Compensation insurance shall be in compliance with the Workers Compensation law of the State of Louisiana. Employers Liability is included with a minimum limit of \$500,000 per accident/per disease/per employee. If work is to be performed over water and involves maritime exposure, applicable LHWCA, Jones Act, or other maritime law coverage shall be included and the Employers Liability limit increased to a minimum of \$1,000,000. A.M. Best's insurance company rating requirement may be waived for workers compensation coverage only.

2. Commercial General Liability

Commercial General Liability insurance, including Personal and Advertising Injury Liability and Products and Completed Operations Liability, shall have a minimum limit per occurrence based on the project value. The Insurance Services Office (ISO) Commercial General Liability occurrence coverage form CG 00 01 (current form approved for use in Louisiana), or equivalent, is to be used in the policy. Claims-made form is unacceptable.

The aggregate loss limit must apply to each project. ISO form CG 25 03 (current form approved for use in Louisiana), or equivalent, shall also be submitted. The State project number, including part number, and project name shall be included on this endorsement.

COMBINED SINGLE LIMIT (CSL) PER OCCURRENCE

| Type of Construction | Projects up to \$1,000,000 | Projects over \$1,000,000 up to \$10,000,000 | Projects over \$10,000,000 |
|---|----------------------------|--|----------------------------|
| New Buildings: | | | |
| Each Occurrence Minimum Limit | \$1,000,000 | \$2,000,000 | \$4,000,000 |
| Per Project Aggregate | \$2,000,000 | \$4,000,000 | \$8,000,000 |
| Renovations: The building(s) value for the Project is \$_____. | | | |
| Each Occurrence Minimum Limit | \$1,000,000** | \$2,000,000** | \$4,000,000** |
| Per Project Aggregate | 2 times per occur limit** | 2 times per occur limit** | 2 times per occur limit** |

** While the minimum Combined Single Limit of \$1,000,000 is required for any renovation, the limit is calculated by taking 10% of the building value and rounding it to the nearest \$1,000,000 to get the insurance limit. Example: Renovation on a \$33,000,000 building would have a calculated \$3,000,000 combined single limit of coverage (33,000,000 times .10 = 3,300,000 and then rounding down to \$3,000,000). If the calculated limit is less than the minimum limit listed in the above chart, then the amount needed is the minimum listed in the chart. Maximum per occurrence limit required is \$10,000,000 regardless of building value. The per project aggregate limit is then calculated as twice the per occurrence limit.

3. Automobile Liability

Automobile Liability Insurance shall have a minimum combined single limit per occurrence of \$500,000.00. ISO form number CA 00 01 (current form approved for use in Louisiana), or equivalent, is to be used in the policy. This insurance shall include third-party bodily injury and property damage liability for owned, hired and non-owned automobiles.

4. Excess Umbrella

Excess Umbrella insurance may be used to meet the minimum requirements for General Liability and Automobile Liability only.

5. **Builder's Risk (Not applicable for this project)**

Builder's Risk Insurance shall be in an amount equal to the greater of the fully-completed project value or the amount of the construction contract including any amendments and shall be upon the entire work included in the contract. The policy shall provide coverage equivalent to the ISO form number CP 10 20, Broad Form Causes of Loss (extended, if necessary, to include the perils of wind, earthquake, collapse, vandalism/malicious mischief, and theft, including theft of materials whether or not attached to any structure). Flood coverage shall be provided by the Contractor on the first floor and below for projects North of the Interstate Corridor beginning at the Texas - Louisiana border at Interstate 10 East to the Baton Rouge junction of Interstate 12, East to Slidell junction with Interstate 10 to the Louisiana - Mississippi border. If flood is purchased as a separate policy, the limit shall be ten percent (10%) of the total contract cost per occurrence (with a max of \$500,000 if NFIP). Coverage for roofing projects shall **not** require flood coverage.

On projects South of this corridor, flood coverage shall be provided by the State of Louisiana as the owner. The Contractor will be liable for the \$5,000 policy deductible from the Notice to Proceed date through the date of final payment of the project in the event of a flood loss.

A Specialty Contractor may provide an installation floater in lieu of a Builders Risk policy, with the similar coverage as the Builder's Risk policy, upon the system to be installed in an amount equal to the greater of the fully-completed project value or the amount of the contract including any amendments. Flood coverage is not required.

The policy shall not be cancelled for any reason, except non-payment of premium.

B. **DEDUCTIBLES AND SELF-INSURED RETENTIONS**

Any deductibles or self-insured retentions must be declared to and accepted by the Agency. The Contractor shall be responsible for all deductibles and self-insured retentions.

C. **OTHER INSURANCE PROVISIONS**

The policies are to contain, or be endorsed to contain, the following provisions:

1. Workers Compensation and Employers Liability Coverage

The insurer shall agree to waive all rights of subrogation against the Agency, its officers, agents, employees and volunteers for losses arising from work performed by the Contractor for the Agency.

2. General Liability Coverage

a. The Agency, its officers, agents, employees and volunteers are to be added as additional insureds as respects liability arising out of activities performed by or on behalf of the Contractor; products and completed operations of the Contractor, premises owned, occupied or used by the Contractor. ISO Form CG 20 10 (current form approved for use in Louisiana), or equivalent, is to be used.

b. The Contractor's insurance shall be primary as respects the Agency, its officers, agents, employees and volunteers. The coverage shall contain no special limitations on the scope of protection afforded to the Agency, its officers, officials, employees or volunteers. Any insurance or self-insurance maintained by the Agency shall be excess and non-contributory of the Contractor's insurance.

c. The Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the policy limits.

3. Builder's Risk – Required if Project Cost is \$50,000 or more.

The policy must include an endorsement providing the following:

In the event of a disagreement regarding a loss covered by this policy which may also be covered by a State of Louisiana self-insurance or commercial property policy through the Office of Risk Management (ORM), Contractor and its insurer agree to follow the following procedure to establish coverage and/or the amount of loss:

Any party to a loss may make written demand for an appraisal of the matter in disagreement. Within 20 days of receipt of written demand, the Contractor's insurer and either ORM or its commercial insurance company shall each select a competent and impartial appraiser and notify the other of the appraiser selected. The two appraisers will select a competent and impartial umpire. The appraisers will then identify the policy or policies under which the loss is insured and, if necessary, state separately the value of the property and the amount of the loss that must be borne by each policy. If the two appraisers fail to agree, they shall submit their differences to the umpire. A written decision by any two shall determine the policy or policies and the amount of the loss. Each insurance company agree that the decision of the appraisers and the umpire if involved will be binding and final and that neither party will resort to litigation. Each of the two parties shall pay its chosen appraiser and bear the cost of the umpire equally.

4. All Coverages

- a. Coverage shall not be canceled, suspended, or voided by either party (the Contractor or the insurer) or reduced in coverage or in limits except after 30 days written notice has been given to the Agency. Ten-day written notice of cancellation is acceptable for non-payment of premium. Notifications shall comply with the standard cancellation provisions in the Contractor's policy.
- b. Neither the acceptance of the completed work nor the payment thereof shall release the Contractor from the obligations of the insurance requirements or indemnification agreement.
- c. The insurance companies issuing the policies shall have no recourse against the Agency for payment of premiums or for assessments under any form of the policies.
- d. Any failure of the Contractor to comply with reporting provisions of the policy shall not affect coverage provided to the Agency, its officers, agents, employees and volunteers.

D. ACCEPTABILITY OF INSURERS

All required insurance shall be provided by a company or companies lawfully authorized to do business in the jurisdiction in which the Project is located. Insurance shall be placed with insurers with a A.M. Best's rating of **A-:VI or higher**. This rating requirement may be waived for workers compensation coverage only.

If at any time an insurer issuing any such policy does not meet the minimum A.M. Best rating, the Contractor shall obtain a policy with an insurer that meets the A.M. Best rating and shall submit another Certificate of Insurance as required in the contract.

E. VERIFICATION OF COVERAGE

Contractor shall furnish the Agency with Certificates of Insurance reflecting proof of required coverage. The Certificates for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. Name of Agency
Agency Address

In addition to the Certificates, Contractor shall submit the declarations page and the cancellation provision endorsement for each insurance policy. The Agency reserves the right to request complete certified copies of all required insurance policies at any time.

Upon failure of the Contractor to furnish, deliver and maintain such insurance as above provided, this contract, at the election of the Agency, may be suspended, discontinued or terminated. Failure of the Contractor to purchase and/or maintain any required insurance shall not relieve the Contractor from any liability or indemnification under the contract.

If the Contractor does not meet the insurance requirements at policy renewal, at the option of the Agency, payment to the Contractor may be withheld until the requirements have been met, OR the Agency may pay the renewal premium and withhold such payment from any monies due the Contractor, OR the contract may be suspended or terminated for cause.

F. SUBCONTRACTORS

Contractor shall include all subcontractors as insureds under its policies OR shall be responsible for verifying and maintaining the Certificates provided by each subcontractor. Subcontractors shall be subject to all of the requirements stated herein. The Agency reserves the right to request copies of subcontractor's Certificates at any time.

If Contractor does not verify subcontractors' insurance as described above, Agency has the right to withhold payments to the Contractor until the requirements have been met.
