VENDOR INQUIRY: Please provide pictures, and product size measurements for all 62 items listed on your bid request.

RESPONSE:

Item	Quantity	Description
1	12	Rack System: <i>Item#:</i> S-MRR-SS (Signature) 3" x 4" Full Rack w/ Stainless Steel Slots <i>Size:</i> Overall dimensions are 49" wide, 136" deep and 108" tall. Weigh 1600lbs <i>Description:</i> Signature Stainless Full Rack 6 post Rack System with Weight Storage for Olympic Plates. Stainless steel adjustment slots are spaced every 3" to accommodate all users. Each 1 - 20 Slots must be Laser Cut Numbered. Bottom brace of rack is raised 5" to allow an extra wide squat stance (greater than 43" of inside of rack). Rack is supported on six rubber coated feet to help keep it from "walking" during use. Rack includes a pull up attachment. Weight Storage posts have a ¼" thick laser cut arch brace as an integral part for strength and allows for a "walk through" design (no cross braces on bottom to get in the way). Arch brace has a full color logo on both sides. 2 Sets of adjustable Bar Catches for racking weight bar and 2 ½" x 2 ½" tube safety bars on half rack side. Weight Storage Pegs, Bar Catches and Safety Spotters have UHMW protection, and all bottom braces are covered in UHMW to reduce paint scratches when using chains. Stretch Band attachments at the bottom (raised 5" from top of floor – to allow for squat stance wider than 43") and top of the rack on both sides. Length between first and last adjustment holes are in 5" increments. Twelve (12) removable UHMW covered adjustment pegs with spring collars extend 9" from outside edge of rack to allow proper band position on bar. 2 Multi-functional top braces have 1" holes on all four sides for easy attachment of accessories such as pull-up ropes, balls, etc. <i>Frame:</i> 4" x 3" 7 gauge and 3" x 3" 7 gauge welded construction. All structural frame bolts go thru tubing and have 3/8" thick backing plates and are ½" Zinc coated with washers and lock nuts. Non-structural attachments are attached with ½" flat head bolts tapped into frame post. <i>Stainless Steel Skins:</i> Each of the 4 outside upright adjustment post are covered in 11-gauge stainless steel laser slotted skins with 3" adjustment slots. Adjustment slots have numbers (1 thru 20) lasered into the stainless steel. <i>Parts:</i> Bar Catches are formed from 3/8" steel. Two 1" round pegs support the catch in the slots. UHMW plastic protection cover high wear areas. 1" thick UHMW contact area protects the knurling on Olympic bars and has a sloped gusset under bar catch for safety. It can be easily replaced if ever worn. Weight storage pegs are 1" solid round bar welded to 2" x 3/8" flat bar covered with UHMW capped pegs. Weight pegs are bolted on as a set and can be replaced easily if ever damaged. <i>Paint:</i> Metal is pretreated with an iron phosphate wash then a 2-3mil baked on powder coating finish is applied. All high wear parts are coated using a texture powder coating.
