ADDENDUM # 1

Bid Number: 50-00148687

Bid Due Date: October 16, 2025

Labor, Materials, and Equipment Needed for Track Resurfacing at Johnny Jacobs Playground.

Question & Answer:

Question: We respectfully submit for your consideration a request to approve the following product as an accepted substitute on the Track Resurfacing at Johnny Jacobs Playground.

Answer: The Department has approved California Sports Surface (Plexitrac Accelerator) as an alternate.

*****SEE ATTACHED APPROVED SPECIFICATIONS*****

*****LAST DAY FOR ALL QUESTIONS AND INQUIRIES IS OCTOBER 8, 2025 AT 2PM*****

*****PLEASE REMEMBER TO ACKNOWLEDGE THIS ADDENDUM BY NUMBER ON YOUR BID SUBMISSION*****

Sincerely,

A handwritten signature in blue ink, appearing to read "Ruby Tran".

Ruby Tran, Purchasing Specialist II
Jefferson Parish Purchasing Department

Bidders must acknowledge all addenda on the bid form. Bidder acknowledges receipt of this addendum on the bid form by indicating the addendum number listed above. Failure to list each addenda number on the bid form will result in bid rejection.

This addendum is a part of the contract documents and modifies the original bidding documents and specifications. The contents of this addendum shall be included in the contract documents. Changes made by this addendum shall take precedence over the documents of earlier date.

RUNNING TRACK RESILIENT SURFACING (PLEXITRAC ACCELERATOR)

PART 1 GENERAL

1.1 DESCRIPTION

Furnish and install Plexitrac[®] Accelerator Running Track resilient surfacing as manufactured by California Sports Surfaces on the accepted asphalt pavement.

NOTE: Color selection required by owner/designer

1.2 RELATED SECTIONS

A. Related work

- Drainage (sec 33 41 00)
- Aggregate Base (sec 32 11 23)
- Asphalt Pavement (sec 32 12 16)
- Athletic Equipment (sec 11 68 33)

B. References

1. National Asphalt Pavement Association (NAPA)
2. USA Track & Field (USATF)
3. National Federation of State High School Associations (NFHS)
4. National Interscholastic Athletic Administrators Association (NIAAA)
5. World Athletics (formerly known as International Association of Athletics Federation)
6. American Sports Builders Association (ASBA)
7. American Society for Testing & Materials (ASTM)

1.3 QUALITY ASSURANCE

- A. Asphalt surface shall comply with the guidelines of the ASBA and NAPA for surface planarity and density.
- B. All liquid materials shall be from a single source and manufactured for the purpose of resilient track construction.
- C. The contractor shall record the batch number of each product used on the site and maintain it throughout the warranty period.
- D. The contractor shall provide the owner, an estimate of the volume of each liquid product and the weight of the rubber granule to be used on site.
- E. The installer shall be an Authorized Applicator of the specified surface system.
- F. The manufacturer's representative will be available to help resolve material issues.

1.4 SUBMITTALS

- A. Manufacturer's specifications for components and system.
- B. Representative sample of the system to be installed with appropriate labeling for identification.
- C. Current safety data sheets (SDS) for the liquid components.
- D. Current Authorized Applicator certificate from the surface system manufacturer.
- E. A certificate from the manufacturer of the binders and coatings stating that the materials have been produced specifically for the use in sports surfacing construction.
- F. A complete list of materials intended to be used in the construction of the running track system. All liquid quantities will be prior to dilution.
- G. A test report that the 12mm/1/2" system has been tested to World Athletics and ASTM standards for force reduction, modified vertical deformation, coefficient of friction (wet) and elongation at break for permeable systems. Force reduction shall be 35-50% (ASTM F 2157). Modified vertical deformation shall be 0.6-2.5 mm (ASTM F 2157). Coefficient of friction shall be greater than .5/wet (ASTM F 2157). Elongation at break shall be greater than 40% (ASTM D 412).
- H. Reference list from the installer of at least 5 projects of similar scope done the past three years.
- I. Product substitution: If other than the product specified, the contractor shall submit at least 7 days prior to the bid date a complete type written list of proposed substitutions with sufficient data, drawings, samples and literature to demonstrate that the proposed substitution is of equal quality and utility to that originally specified. Information must include a QUV test of at least 1,000 hours and World Athletics test information for the system to be installed.

1.5 MATERIAL HANDLING AND STORAGE

- A. Store material in accordance with manufacturer's specifications and SDS.
- B. Deliver products to the site in original, unopened containers with labels attached.
- C. All surfacing materials shall be non-flammable.

1.6 GUARANTEE

- A. The installer and the materials manufacturer shall supply a warranty covering labor and materials respectively. The warranty period shall be for five (5) years.

1.7 INSTALLER QUALIFICATIONS

- A. Installers shall be regularly engaged in the construction and surfacing of running tracks.
- B. Installer shall be an authorized applicator of the specified system.
- C. Installer shall be a builder member of the ASBA.

1.8 MANUFACTURER QUALIFICATION

- A. Material supplier shall certify that the materials provided are manufactured specifically for construction and surfacing of running tracks.
- B. System manufacturer shall be a US owned company that has been continuously engaged in the business of track surfacing materials for at least 10 years.
- C. Manufacturer shall be a member of the ASBA.
- D. System manufacturer shall have a designated representative available for site inspection.

PART 2 PRODUCT

2.1 MANUFACTURER

- A. Manufacturer – California Sports Surfaces, Andover, MA
www.californiasportssurfaces.com
- B. Any materials used must be an emulsion/water-based product. Any products which require solvents such as MEK, Butyl Cellusolve or Acetone for clean up or mixing are not acceptable.
- C. Materials must have a VOC less than 150g/lit. for binder products. Topcoats shall have a VOC of less than 100g/lit. measured by EPA method 24.
- D. Materials may not have a flash point of less than 200°F.

2.2 MATERIALS

Court Patch Binder-	100% Acrylic resin blended with Portland Cement and Silica Sand
8425 ICP Tack Coat-	Latex emulsion Primer. SBR emulsion
Plexitrac Binder-	High Viscosity Polyresin Blend
Plexitrac Pigment-	Water-borne dispersed pigment for enhanced color
Plexitrac Coating-	Highly Pigmented Polyresin Top Coat
California Line Paint-	100% Acrylic Resin containing no alkyds or vinyl co-polymer constituents
Rubber Granules-	Specifically gradated 1-3MM SBR and/or EPDM particles for job mixing with the Plexitrac Binder
Water-	The water to be used in the mixture must be fresh and potable

The installer will provide to the Owner/Architect a proforma materials list prior to the installation of the volume of materials to be used on the project. The proforma will include the following:

- a) Surface area to receive the surfacing system _____ square yards
- b) Specified thickness ½" in.
- c) Pounds of Rubber 10.5 lb. sq./y SBR 5.0 lb. sq./y Colored EPDM
- d) Gallons of 8425 (Undiluted) .04 gal/sq./y

- e) Gallons of Colored Plexitrac Binder (Undiluted) 1 gal. per 18 lbs. SBR / 1 gal. per 21 lbs. EPDM Minimum
- f) Gallons of Plexitrac Pigment (Final Binder Application) 3 gal. per 55 gal. Binder
- g) Gallons of Colored Plexitrac Coating (Undiluted) .1 gal. / sq./y

The installer will furnish the Owner/Architect with a proof of delivery that the correct volume of product has been provided. The installer will also verify that the same manufacturer has supplied all binders and coatings.

PART 3 EXECUTION

3.1 WEATHER LIMITATIONS

- A. Ambient and surface temperatures must be 55°F/13°C and rising.
- B. Installation should not be conducted during rainfall or when rainfall is imminent.
- C. Do not apply when surface temperature is in excess of 130°F/55°C.

3.2 SURFACE PREPARATION

- A. New asphalt shall be allowed to cure for a minimum of 14 days prior to the application of any surfacing materials. New concrete shall be allowed to cure for a minimum of 28 days prior to application of any surfacing materials.
- B. The surface must be thoroughly cleaned of all loose dirt and debris.
- C. Prior to the application of resilient surface materials, the entire surface shall be flooded and checked for depressions or irregularities in the asphalt. Any puddle area covering a nickel shall be marked and repaired with Court Patch Binder, according to California Sports Surfaces Specification 10.14. After patching, the asphalt surface shall not vary more than 1/4" in 10 feet, measured in any direction. Any depressions 1/4" or greater, shall be leveled using patch materials indicated. Slopes shall meet the guidelines of the ASBA and NFHS/NCAA/World Athletics

3.3 RESILIENT SURFACE INSTALLATION

- A. After curing and preparation, the asphalt shall be primed/tack coated with 8425 at the rate of .04 gal/sy. by means of a dual diaphragm pump and spray unit. Do not allow material to puddle on the asphalt surface.
- B. Apply dry 1-3 MM Black SBR to the tack coated surface by mechanical spreader or by hand. Avoid leaving dry rubber granules more than one layer thick.
- C. Apply Plexitrac Binder at the rate of one gallon per 18 lbs. of Black SBR granule by means of a dual diaphragm pump and spray unit. Care should be taken to uniformly spray the granules, so they are fully encapsulated. Add 3 gallons of Plexitrac Pigment per 55 gallons of Plexitrac Binder when laying final application.
- D. Apply additional layers of Black SBR granule and Plexitrac Binder until the specified thickness and weight of Black rubber has been applied. Each dry layer should be raked by hand to insure uniformity of thickness and density. In no case

should a rubber layer be greater than 2.5 lbs./square yard prior to Plexitrac Binder Application.

- E. Apply dry 1-3 MM Colored EPDM granule at the rate not more than 2.5 lbs./sy. Not less than two layers shall be applied.
- F. Apply Plexitrac Binder at the rate of one gallon for 21 lbs. of 1-3 MM Colored EPDM granule. Plexitrac pigment shall be added to Plexitrac Binder for added UV stability.
- G. Prior to application of Plexitrac Coating and line marking, the surface shall be tested for the required depth using SMG FT-3 Floor Tester depth gauge. The running track oval shall be tested in no less than 100 locations. The tests shall be performed at the center of both the outer and inner lane, as well as, the center of the oval. At least 80% of the readings must meet the required depth, if not, additional layers of rubber and binder will be applied until the proper depth has been achieved.
- H. Apply Plexitrac Coating at the total rate of .1 gallon per square yard. Product shall be applied in two applications by a dual diaphragm pump spray unit. One application shall be applied clockwise, the other counterclockwise.

3.4 MARKING AND MEASUREMENTS

- A. Wait 48 hours after surface completion before applying line marking. The installer shall:
 - a) Locate and establish all radius points.
 - b) Establish and set all necessary control points.
 - c) Layout all lines and markings to tolerances set forth by ASBA and governing body requirements.
 - d) Prepare all necessary drawings.
 - e) Provide all computations and measurements in organized form.
 - f) Establish all locations on the curves using a Transit or Theodolite capable of reading direct to 20 seconds.
 - g) Identify all markings, where appropriate, by painting the identification directly onto the track surface in 4" letters just below or in front of each mark in the right-hand portion of the lane.
 - h) Paint all of the large, 3' high, lane numbers in two (2) colors, utilizing shadowed backgrounds.
 - i) All lines shall receive sufficient paint to assure complete opacity and uniformity of color.
 - j) Paints shall be used directly from original containers and shall be thinned only when hot temperatures dictate thinning for smooth applications.
 - k) Amount of paint used shall be as recommended by the manufacturer.
 - l) The paint used shall be a 100% acrylic latex line paint, Plexicolor Line paint, made especially for the painting of lines on sports surfaces
 - m) All measurements shall be made by competent, experienced and fully qualified personnel.

- n) Upon completion of the track markings, a licensed professional engineer or registered land surveyor shall furnish an acceptable letter of or certificate of, accuracy to the Owner attesting to the accuracy of the track markings and measurements. This will also include copies of the computations, calculations and drawings that were used to obtain this accuracy. The Engineer or Surveyor should affix their stamp to the drawing and the certificate.
- o) The markings shall include all events and marks required or recommended by the National Federation of State High Schools, the NCAA, or World Athletics dependent on the end use of the facility.

3.5 PROTECTION

- A. During construction, the owner is responsible for limiting access of non-construction personnel to the site.
- B. The owner shall coordinate any irrigation of fields with the installation contractor.
- C. The installer shall protect curbs, fences and other structures from overspray.

3.6 CLEAN UP

- A. Remove all containers, surplus and debris and dispose of in accordance with local, state and Federal regulation.
- B. Remove all spills and overruns.
- C. Leave site in a clean and orderly condition.

**LIMITED WARRANTY
PLEXITRAC® ACCELERATOR**

Company
Project Name
City, State, Zip Code
Completion Date:

Date: 3/7/2019

California Sports Surfaces warrants that Plexitrac products, when mixed and applied in accordance with applicable specifications, are suitable for use as an athletic running track surface. This warranty is in effect from the date of substantial completion for a period not to exceed five years. This warranty specifically disclaims damage from grass intrusion, lawn mowers, vandalism, non-athletic uses, and normal wear and tear. Lane and event markings are not covered.

California Sports Surfaces' Plexitrac products are formulated based on accepted industry norms for rubber granules and base construction. Variation from specifications or substandard performance of these components is beyond our control and not covered by the warranty.

If a warranty defect is noted, the original installation contractor must notify California Sports Surfaces in writing. If it is determined that a defect does exist, replacement materials shall be provided to the authorized installer at no charge for the affected area.

Warranty coverage is not available unless the contractor provides complete, contemporaneous information on the batch numbers of Plexitrac products used, the date of delivery, proof of original full payment, the date of installation, the source, the size and the quantity of the rubber used, and the total square yards installed.

This warranty does not cover costs associated with installation, loss of use, or any consequential damage. No agent of California Sports Surfaces may modify or extend this warranty.

Tom Magner
Director of Sales, Sport Surfaces

International Association of Athletics Federations

Mr A. F. Tucker
Vice President Recreational Products
California Products Corporation
150 Dascomb Road
ANDOVER, MA 01810
USA

Monaco, 16 March 2006

Dear Mr Tucker

I refer to your discussions in Canberra, Australia with Mr Denis Wilson, Honorary Technical Adviser IAAF Technical Committee, in January 2006 about acceptance by the IAAF of latex based synthetic surfaces and in particular your Plexitrac Accelerator.

It is acknowledged by the IAAF that Plexitrac Accelerator meets the force reduction, vertical deformation and friction requirements of the IAAF Performance Specifications for synthetic surfaces. However, Plexitrac Accelerator tensile properties are slightly less than the minimum limits set in the performance specifications for porous synthetic surfaces.

The IAAF Technical Committee at its recent meeting determined not to change those limits or to have a separate category for latex bound synthetic surface tracks. Therefore it is not possible for Plexitrac Accelerator at present to receive an IAAF Product certificate. However, it is quite acceptable for Plexitrac Accelerator to be used on tracks for national competition and training. Any records and performances made on tracks surfaced with Plexitrac Accelerator would be recognised by the IAAF provided all the requirements of the IAAF are met as regard to the measurement of the facility and the conduct of the competition.

I wish you well in your track surfacing business.

Yours sincerely

Imre Matrahazi
IAAF Technical Manager
