2. Jefferson Parish to install object markers with posts at guardrail locations.

Delivery and/or disposal of salvaged materials is at no direct pay with the exception of concrete guardrail posts (see bid item).

If required, a layout plan for each job shall be provided by this department. All layout and placement shall be the responsibility of the vendor.

All of the work within the limits of each job shall be shown to the contractor by a representative of the Department of Public Works prior to commencing work. Appropriate sketches and/or drawings may be furnished to the contractor with each work order. Work site may be scattered for an individual work order; however, every effort will be made to consolidate the work to minimize scattered work sites.

Each work order will be issued in letter form with appropriate drawings or other attachments as necessary and will designate a job number (WO#00-00000). All correspondence, billing, etc., pertaining to the work should reference this job number designation, the contract estimate and WO numbers. Payment will be made upon receipt of detailed and itemized invoices and verification by public works inspectors regarding quantity and quality of work performed. Partial payments will be made only when completion is unduly delayed through no fault of the contractor, in which case requests for partial payment may be submitted monthly.

For this proposal, the definition of "JOB" shall be the work described on any one issued work order.

The contractor will be required during the term of this contract to respond to verbal notification, that a guardrail location has been damaged and services are required. Within one (1) week of notification the contractor shall file a damage report listing the items proposed for replacement or repair at the site with the project engineer. The project engineer will review the specific items of work and issue a written work order stating the specific location or locations and authorizing the contractor to begin work. The work order will also specify replacement of damaged parts or furnish and replace damaged parts.

The contractor shall begin the work within ten (10) days after the issuance of a work order. The contractor will complete all work at a site within five (5) working days from the time he shows up on site. Failure to begin or complete the work within the time specified will result in the assessment of stipulated damages (\$250.00/day).

If any liens are filed during execution of this contract, the parish shall withhold the next accruing payment and shall have the authority to satisfy the claim and deduct the amount from payments due.

If any liens arising out of this contract should be discovered to exist after all payments are made, the contractor shall refund the parish all monies that the latter maybe compelled to pay in discharging such liens, including litigation costs and attorney's fees.

Adequate safety precaution will be taken for all work performed under this contract. Necessary barricades, signs, lights and warning devices will be installed and maintained by the contractor. The contractor shall be responsible for providing safe and expeditious movement of traffic through construction zones, i.e., the immediate area of actual construction and all abutting areas which are used by the contractor and which interfere with the driving and walking public. The responsibility includes, but is not limited to such items as proper construction warning signing, signals, lighting devices, markings, barricades, channelization and hand signaling devices (flagging operations). The principal and prescribed standards are set forth in Part VI of the Manual on Uniform Traffic Control Devices. Part VI should be strictly followed.

All of the signing and traffic control devices shall be approved by the Office of Traffic Engineering, Jefferson Parish Department of Public Works prior to starting of the job. All expenses related to maintain traffic is incidental to the job. There is no added or additional payment.

During the performance of all work as outlined in these specifications, the contractor will exercise due caution regarding underground utilities, storm water drainage pipe and will cooperate with representatives of the respective utility companies and/or parish departments to avoid damage to their installations. The contractor will be required to restore at his own expense or reimburse the parish for the cost to repair any parish infrastructure that he damages.

The contractor must protect, support and maintain all subsurface, surface and aerial utilities. In the event of any damage to the existing utilities, contractor shall restore service, as soon as possible at his own expense. The contractor shall have the sole responsibility of resolving any lawsuits and liabilities arising from defective workmanship and/or improper maintenance of utilities.

It is understood by the undersigned that the quantities given in the schedule of bid prices are a fair approximation of the amount of work to be done and that the sum of the products of the approximate quantities multiplied by the unit price bid constitute the base bid price,

which sum shall be used in the comparison of bids and the awarding of the respective contracts.

The quantities given in the proposal form are approximate for the comparison of bids only. The parish reserves the right to purchase only such items and in such quantities as needed for initial period of two (2) years after acceptance of the lowest responsible bid by the parish governing authority.

The specific part(s) identified in these specifications and attached manufacturer spec sheet(s) reflect the equipment the Parish currently uses and will be the primary part covered under the maintenance portion of this contract. Referencing this part is intended to clearly show bidders what they will be working on and maintaining, and to ensure compatibility with existing systems. If new or replacement parts are required, the Parish seeks to maintain consistency by using the same part or, if in the Parish's best interest, an approved equivalent that meets all specifications and project needs. These references are not intended to limit competition, but to avoid the unnecessary cost and disruption of replacing existing equipment solely to accommodate different products. Equivalent parts may be considered at the Parish's sole discretion, provided all required documentation is submitted and the parts meet the stated requirements.
