Supplier Inquiry and Response

Q1. If there are different pricing scenarios based on either packaging or multiple items listed under a single Item Description. Can these be broken out? We want to be able to offer LSU the best price point for each item. Examples:

a. Items 18 and 19 – we have different price points for sludges and solids for incineration.
b. Items 20 and 21 – we have potentially different price points for Toxic Debris and Spill Cleanup if they are non flammable and or not highly toxic
c. Items 22, 23 and 24 – We have different price points for Loosepacks for Incineration based on material type, ie, flammable, Corrosive, highly toxic.
d. Item 25 – A lab pack in a direct charge container will have a different cost than a 55 gallon drum of an oxidizer
e. Item 41 – Mercury Soil streams have different pricing structures than COD Vials and other Inorganic Mercury Compounds

A1. See attached revised price sheet.

Q2. Can LSU please provide copies of manifests that have been shipped over the past year?

A2. See attached manifests.

Q3. Can LSU please provide more details on the chemical composition of the “bulk solid or sludge” referenced in line items 17-19 & 33-34? Are these assumed to be hazardous or non-hazardous waste?

A3. Line 17. Bulk liquid, solid, sludge for incineration - 1 gallon drum to 9 gallon drum (to include petroleum engineering profiles). The only repeat streams currently are:

CH136000	WATER AND BENTONITE EMULSION /PETROLEUM ENGINEERING FLAMMABLE MUD (PETROLEUM ENGINEERING FLAMMABLE MUD IN CH)
CH1135305	WATER AND BENTONITE EMULSION /PETROLEUM ENGINEERING MUD (PETROLEUM ENGINEERING MUD IN CH)

Line 17. Bulk liquid, solid, sludge for incineration - 1 gallon drum to 9 gallon drum. There are no other examples for the last few years.

Lines 18-19. 33-34. Bulk solid or sludge for incineration or thermal treatment. The only repeat streams currently are:

CH1134935	OIL/WATER/DIRT
CH2930104	SODA LIME

Lines 18-19. 33-34. Past history, one-time streams, were:

CH1629055	CANE SYRUP WITH SULFURIC ACID
CH1584736	FIRE EXTINGUISHER MEDIA
CH1479674	LITHIUM CARBONATE
CH1485372	LITHIUM MANGANESE OXIDE
CH1306153	SULFURIC ACID/POTASSIUM DICHROMATE (DICHROMATE ACID CLEANING SOLN)

Q4. Can LSU please provide more details on the chemical composition of the "bulks solids for treatment and/or landfill" referenced in line items 100 & 101? Are these assumed to be hazardous or non-hazardous waste?

A4. Lines 100-101. Bulk solids for treatment and/or landfill. The only repeat streams currently are:

CH1134787	CERAMIC ARTS GLAZE & RAW MATERIALS
CH106051	NICKEL SULFAMATE SOLID (60)

There are no other examples for the last few years.

Q5. Can LSU please provide more details on the chemical composition of the "bulks liquids for treatment and/or landfill" referenced in line items 103 & 104? Are these assumed to be corrosive liquids?

A5. Lines 103-104. Bulk liquids for treatment and/or landfill. The only repeat streams currently are:

CH1625151	GEN CHEM CONDUCTIVITY AND TITRATION
CH1584916	GEN CHEM QUALITATIVE ANALYSIS

There are no other examples for the last few years.

Q6. Can LSU please clarify the anticipated scope of the "onsite reactive stabilization with remote opening" referenced in line item 62?

A6. Line 62. Past hazardous waste vendors chose not to ship potential peroxide formers and other items potentially problematic for shipment. Past hazardous waste vendors have provided a separate team at LSU for onsite reactive stabilization with remote opening of the items of concern.

- This is performed once or twice a year at the Main LSU BR campus.
- This has been performed once every few years at the LSU Shreveport Health Sciences campus.
- This has been performed once every few years at the LSU New Orleans Health Sciences campus.
- The other LSU locations have not needed this line item.

Additionally, Line 63. Past hazardous waste vendors chose not to ship potential peroxide formers and other items potentially problematic for shipment. Past hazardous waste vendors provided the service of onsite reactive stabilization with no remote opening. These services were provided by the labpack team already at LSU for the regular quarterly waste pickup services. They wanted a charge for each item handled. LSU has not utilized this line item in many years.

While pricing is required for all items for bid to be considered, all items are on an as needed basis.

Q7. Are the drums referenced in the supply lines open-head or closed-head?

A7. See attached revised price sheet for item descriptions for lines 84-97.

Q8. Sections 3 and 5: If LSU exercises either of the two optional 12-month renewals, will LSU consider documented adjustments for disposal-facility increases, regulatory fees, fuel, labor, or other externally imposed cost changes that occur after the initial contract year?

A8. The Supplier may submit documentation supporting a request for adjustments due to disposal-facility increases, regulatory fees, fuel, labor, or other externally imposed cost changes during an optional renewal period. LSU may review such

requests but is under no obligation to accept or approve any requested adjustments. Any approved adjustments shall be at LSU's sole discretion.

Q9. Will LA Contractor's License be required to hold LSU contract?

A9. A LA Contractor's license is not required.

Q10. Will LSU consider de-pack and non-incineration disposal methods for the lab pack line?

A10. No, de-pack and non-incineration disposal methods will not be considered. Incineration is the only disposal method of lab packs.

Q11. Can LSU please provide copies of the waste profiles being referenced in these line items?

A11. See Addendum #1, question #2.

Revised Price Sheet - Addendum 02. Suppliers must submit pricing on revised price sheet. Failure to submit pricing on revised price sheet shall result in rejection of your bid.
